**Backend Developer (Consultant) ,** *Manureva Digital Solutions* 10/2025-Present  
Pondicherry

- Working as a consultant on a Leave Management System used for internal operations
- Backend development using Python with PostgreSQL
- Designed and Executed modules for leave requests, approvals, balances, and role changes, Mail sender
- Collaborated with frontend and management to deliver production-ready features
- Hands-on experience in real-time bug fixing, enhancements, and deployment support
- Trained in **Prompt Engineering** and applied AI-assisted workflows for faster development and debugging

## Education

---

**MCA (Recently completed),** *Christ College of Engineering, Pondicherry University* 2025  
74.67%

**B.Sc. Computer Science,** *Hindustan College of Arts and Science* 2022  
73.3%

## Skills

---

### Languages

Python, C, C++, JavaScript, HTML, CSS

### Database

MySQL , PostgreSQL

### Frameworks

Flask, React.js, Bootstrap

### Tools

Git

### Others

IoT, Arduino

## Languages

---

### Tamil

Fluent

### English

Fluent

### Hindi

Read/Write

## Extracurricular Activities

---

- Led workshops on Python and IoT.
- Attended device maintenance training.

## Projects

---

### Plant Watering Reminder System

- Technologies: Python, Flask, SQLite, Email Notification
- Created a web app to notify users when to water plants.
- Implemented email reminders using Flask-Mail.
- Stored and managed plant data using SQLite.

### Touchless Controller (IoT)

- Technologies: Python, IoT, Sensors
- Controlled devices using proximity sensors.
- Integrated basic Python logic to trigger responses.

### Home Service Web Application

- Developed and maintained a full-featured web platform using Django.
- Built RESTful APIs and dynamic admin/user dashboards.
- Applied secure authentication and role-based access.
- Managed database design, migrations, and optimized queries.
- Collaborated using Git and contributed to deployment documentation.
